

MD. MINHAZUR RAHAMAN

House-20, Lane-21, Block-A, Mirpur-10, Dhaka-1216, Dhaka Division, Bangladesh
mridul.mr136@gmail.com — +880 1688800831

Profile

Motivated and detail-oriented individual with a strong foundation in programming and a growing passion for machine learning. I aim to secure an internship where I can enhance my skills in software development and intelligent systems, contribute to real-world projects, and learn from industry professionals in a collaborative, innovation-driven environment.

Education

- **Green University of Bangladesh**
Bachelor of Science
Year: Graduated in 2026
CGPA: 3.28 out of 4.00
- **BCIC College**
HSC
Year: 2020
GPA: 5.00
- **Mirpur Bangla Higher Secondary School**
SSC
Year: 2018
GPA: 5.00

Technical Skills

- **Languages:** JavaScript, TypeScript, Python, SQL
- **Frontend:** React.js, Next.js, HTML, CSS, Tailwind CSS
- **Backend:** Node.js
- **Database:** MySQL, Supabase, Firebase
- **Tools:** Git, GitHub, Figma, cPanel, Vercel
- **AI Tools:** ChatGPT, Amazon Q, Gemini, Claude, Codex, Lovable, Google AI Studio

Experience

QA Harbor

Position-SQA Intern (Oct 2025 – Dec 2025)

Mohakhali DOHS, Dhaka

As an SQA Intern at QA Harbor, I assist in testing web applications by creating test cases, performing manual testing, and reporting bugs. I work closely with developers to verify fixes and ensure product quality. This internship has helped me understand QA processes, regression testing, and basic API testing while improving my analytical skills.

Solution Hub Technologies(Sohub)

Position-Software Engineering Intern (Jan 2026 – Mar 2026)

Katasur Road, Mohammadpur, Dhaka

Worked as a Software Engineer at Sohub, contributing to the rebuilding and improvement of the Sohuh website and Sohuh Connect website to ensure better performance and user experience. Handled improvements for the EMP Employee Max Portal by resolving user observation issues, fixing system problems, and adding new features to improve functionality and operational efficiency. Participated in Omama client meetings for requirement analysis, technical discussions, and project coordination to ensure smooth execution and client satisfaction. Worked with technologies including React.js, Node.js, PHP, MySQL, Supabase, Firebase, HTML, CSS, JavaScript, Bootstrap, and API integration for frontend, backend, database management, authentication, and cloud-based services.

Thesis

- Pothole Detection using Yolov11 and Deep Learning Model With Custom Dataset (Present)
- Probabilistic IoT Intrusion Detection System Using CNN-GRU with Blockchain-Based Security for Smart Environments (Present)

Projects

- **Siirham Website**

Developed a custom clothing store website where customers can personalize clothing designs and place orders based on their preferences. Built the frontend using React.js with a modern responsive UI and used Supabase for database management, authentication, and backend services. Integrated payment gateway solutions, order tracking, custom design approval, and admin panel features for managing products, users, orders, and inventory. Also worked on API integration, system optimization, and overall business workflow improvement.
